Short Term Goals—2013-2014—Adopted by full SAC on 10/1/2013

- Define sustainability focused/related courses and update the list. List available @ http://www.missouristate.edu/Sustainability/publications-and-documents.htm.
- Add a wellness goal and a wellness representative to the advisory committee. **Status unknown**
- Add an optional departmental policy statement related to recycling and sustainability. SGA, Faculty Senate and Provost’s Office. (This Project will need a leader!) **UNMET**
- Submit sustainability minor for approval by Faculty Senate with the goal of offering in 2014. **WORK IS ONGOING WITH TARGET OF SPRING 2015. (HELP IS NEEDED)**
- Define sustainability research and provide and inventory—both undergraduate and graduate. **NOT MET**
- Provide more employee sustainability education
  - Continue topics covered in new employee orientation. **MET**
  - Implement Green Teams on campus in the fall of 2013. **MET**
  - A new Energy video was incorporated into orientation in Summer 2014
- Develop an action plan to enhance event recycling to include determination of costs and barriers to having a comprehensive event recycling plan. **PARTIALLY MET—ONGOING DISCUSSION**
- Develop a targeted education plan on no idle zones on campus along with a sustainable plan to update signs. **NOT MET**
- Develop sustainability/recycling presentation that could be provided for all GEP101/UHC110 classes and for other classes and groups across campus. **NOT MET-Individual left MSU**
- Explore a bike sharing program that includes the City of Springfield. **Max Wagner is working with Cody Stringer, who is heading up the development of Springfield Bike Share with a tentative start date of spring 2016 – More info available upon request. MET**
- Sustainability GA prepares and electronic newsletter two time each semester that includes the news and events from the MSU website to distribute to the campus community. **MET**
- Investigate the development of an indoor air quality plan. **Indoor air quality plan in progress—will be ready by spring 2015. MET**
- Develop a purchasing policy for Energy Star Appliances and EPA WaterSense. **MET**
- Reapply for Tree Campus USA designation. **MET**
- Adopt a stormwater plan by 2014. **MET—Stormwater plan adopted October 2013**
- Submit AASHE evaluation for STARS by September 2014 to earn silver rating or higher. **DELAYED-STARS has a submission deadline of February 27, 2015, with a goal of a silver rating**
- Continue the LED light conversion. Investigate inclusion of a dimming policy. **PARTIALLY MET—Ongoing**
- Develop a plan to encourage use of public transportation for all faculty, staff and students by January 2014. **Partially Met—Student initiated ZIP Car Program is up and running**
- Write energy recommendations for Missouri State by March of 2014. **PARTIALLY MET—MOU with City Utilities for purchase of solar power—Recommendations will be complete by December 2014.**
- Seek funding for the sustainability coordinator position endorsed by the committee. **MET**
Long term sustainability goals (with recommended timelines)
Adopted December 2013, amended January 2014

• Integrate sustainability goals into the next university long range plan (2016).
  Ongoing

• Develop a comprehensive recycling plan for the entire campus by May of 2015. Partially Met—Campus buildings are now recycling glass and food service will compost food left over from catered events. Food service is recycling for catering events but still working with the composting company to get a bin behind the Union for catering needs. Ongoing

• Set goals to reduce the relative carbon footprint of the university through development and implementation of a toolbox of diverse strategies and programs. Investigate campus reliance on clean/renewable energy sources over time. This goal must be reviewed regularly with new goals set every five years and initiatives must be accompanied with an estimated cost. Baseline data by May of 2015 with specific goals adopted after the baseline is established. (Energy subcommittee)
  GOAL MET—MSU has entered into an MOU with City Utilities to pay a premium for the purchase of solar power from the new City Utilities solar farm. The Foster Activity Center has been awarded LEED Silver designation. Solar tables will be installed at Blair and Foster for recharging of laptops and cell phones. Walkway lights on campus are being converted to LED lamps. LEED Certification complete for Greenwood Science Scholars addition, Basic LEED Certification of Monroe, LEED Certification for the Bond Learning Center.

• Determine greenhouse gas emissions for the Power House by May of 2015 and set goals to limit emissions in the future by May of 2016. Ongoing

• Planning, Design and Construction will continue to incorporate responsible practices. The unit will report to the sustainability advisory committee annually on five year goals, as well as annual accomplishments as they relate to sustainability. Ongoing

• Facilities Management will continue to incorporate responsible practices as the University continues to work on maintenance and repair projects. The department will report to the Sustainability Advisory Committee annually on five year goals, as well as annual accomplishments as they relate to sustainability. Ongoing

• Encourage the Foundation to consider qualitative investment factors as it relates to environmental sustainability as part of the due diligence review process.
  Status Unknown

• Identify, develop, and act upon opportunities where our sustainability efforts can enhance our curricular and co-curricular goals and exemplify our public affairs mission. Ongoing

• Develop a comprehensive review and funding plan for sustainability at Missouri State University to include on-going funding for a director and other staff (as needed in the future) and one-time funds (donor supported) for projects. The need for all on-going funding and one-time funding should be reviewed annually for effectiveness and impact. Ongoing—Update Needed

Assumptions – The Sustainability Advisory Committee (through the Goal Watching Subcommittee) submits an annual progress report. The Sustainability Advisory Committee reviews and updates these long term goals annually. Ongoing
