Formal admission to this major requires completion of at least 25 hrs of course work, including BMS 110, 231, and CHM 160, and a cumulative and science GPA of 2.5 or higher.

In the terminal semester, each CMB major is required to take a comprehensive examination in Cell and Molecular Biology.

The eight-semester plan above is one example of course sequencing; variations are possible.

Significant divergence from the sequence above may require an additional one or two summers for major completion in four years.

* Waiver by exam is possible (no credit).
