Rethink Your Ink

You can recycle your used Inkjet/Toner Cartridge and MSU Environmental Management makes it easy!

Did you know?
* It takes roughly 2 pints of oil to make a new inkjet cartridge, and about 3 quarts of oil to make a new toner cartridge.
* It takes less than half that amount of oil to refurbish cartridges.
* Plastic cartridges that go into a landfill will essentially never decompose.

To Get Your Toner Cartridge Recycled
* Place used/empty cartridge in the original package (if you have it) or a similar size box. You may place multiple cartridges in a single box.
* Call or email Environmental Management (6-8334 or EnvironmentalManagement@MissouriState.edu) to let us know what you have and where you are.
* We’ll come pick it up!

Leaking Cartridge?
* If your cartridge is leaking, please seal it in a plastic bag.

If you have questions, please contact:
MSU Environmental Management at the above-listed phone or email
