Section Number 6.3
Description Wildlife Habitat Policy
Revision 00
Date Approved December 17, 2012
Approved by Bob Eckels, Director Facilities Management

Policy:

Missouri State University aims to provide landscaping and maintenance practices that promote sustainability and habitat for wildlife within an urban setting.

I. Benefits of Wildlife Habitat
   A. Provides food, water, shelter, and nesting opportunities for seasonal and year-round wildlife on the Springfield main campus
   B. Promotes educational opportunities for the campus community to learn about permanent and migratory wildlife in the southwest region of Missouri

II. Removal of wildlife on campus
   A. Missouri State University will only remove wildlife from campus if it is a threat to the campus community or the wildlife itself.
