

Course Name  
Module Learning Guide  
Unit or Week:

### *What you need to know*

At the end of this module students will:

- 1.
- 2.
- 3.

### *Instructor's Notes and other Resource*

This section is where you can list resources and references students will need to access for this module. It is also where you can add your notes or emphasize any of the material presented in the course.

This area should serve as an itinerary for the students as they are progressing through the module. You may want divide this section to include to the list of the required elements as well as recommended or where they can go for more information. List all references such as assigned textbook reading, additional documents or articles, course notes, slide presentations, any type of video or audio, web resources or other references materials students should review. Instruct students as to what they should do as they are going through this material or what they should pay particular attention to with these resources.

### *Learning Activities*

This section is where you can list specific assignments. This area will become a check-list for your students. So anything the student needs to do such as written assignments, discussion board, etc. should be listed with due dates along with how they will submit their work.

The table below is similar to an **assignment table** and can serve as a quick organizer for these items.

<b>Assignments:</b>	<b>Due Date</b>
<i>Complete the <b>Class Survey</b> posted in the Introduction section and share your ideas on the <b>Discussion Board</b></i>
