

Questions for Researching Majors and Academic Programs

- Is there a core curriculum that needs to be completed before applying/being accepted to this program?
- Is there an introductory or informational course that I can take to learn about this major and associated careers?
- What class should I try first if I want to explore this major?
- Is there a GPA requirement?
- Is a master's degree required for me to be competitive in this field?
- What internship/research/career opportunities exist in this department?
- What career paths are graduates with this major pursuing? In what geographic areas?
- Are there campus activities or groups associated with this field that could make me more marketable after graduation?
- Does this major have different options/areas of emphasis? What is the difference?
- Are there related majors/fields that I could also look into?
