

INTERNSHIP OPPORTUNITY

FOR MSU AND MS&T STUDENTS

PROGRAM DESCRIPTION

The Missouri State University (MSU) Sustainability Program's just received an EPA Grant for the **POLLUTION PREVENTION PROJECT (P2 PROJECT)**. This project consists in giving FREE pollution prevention assessments to Missouri manufacturing companies to reduce waste, conserve energy, and save money. Our process consists of the following steps:

The program engages MSU and MS&T students to participate in the assessments gathering data and writing reports. It provides an interactive learning experience in which students will assist businesses in reducing water consumption, energy consumption, waste generation, costs... Therefore, actively helping them lessen their environmental impact, gain competitive advantage and increase their profitability.

BENEFITS

- Students will receive training prior to the assessments.
- Students will be collaborating with the team throughout the entire process.
- Students could be eligible to receive credit hours towards their degree.
- Students will have the chance to participate in an experiential learning opportunity and visit numerous factories.
- Students will make a positive environmental impact.
- GREAT RESUME BUILDER.
