|--------|-----|--------|-----|--------------|----|
| Major: | YES | Minor: | YES | Certificate: | NO |
|--------|-----|--------|-----|--------------|----|

Please see online published semester class schedule and undergraduate catalog for detailed course offering information.

How do you describe the course to students when they ask “What is this class about?” (Without using the catalog description)?

Students, working individually and in groups, learn and apply creative and critical thinking skills with research and Microsoft Office Applications as problem-solving techniques and tools to address real community issues, and prepare a formal written report and oral presentation.

Beyond meeting a General Education requirement, what benefits can students realize from choosing this course?

Problem-solving and research tools, techniques, applications, and group skills learned and practiced in the course can be applied in many academic, professional, and personal situations.

Other than your major/minor/certificate students, what groups of students could find this course relevant to their degree program or career path?

Required for College of Business majors; helpful for all students to learn basics of how to think creatively, critically, conduct research, work in groups, use Office software, and prepare written and oral presentations.

Catalog Description (Fall 2022 Undergraduate Catalog)

Students learn and apply techniques that support critical and creative thinking when solving individual and public policy problems using information technology. Case studies with applied, real-world examples are used throughout. Instructional methods include lecture, discussion, demonstration, guided practice, and technology-supported collaboration.
