1996	16,416	1,154	17,570	128	0.7%
The West Plains Campus began using a separate student database system effective with the fall 1996 semester. Prior to that semester, students taking courses on both campuses were counted only on the campus of their predominant enrollment. From 1996 through 2000, students were counted on each campus through which they were enrolled; thus, the university total was not an unduplicated count.
