CLOSING REMARKS

John Jasinski, Provost

ERIC SHADE MEMORIAL AWARD

Dr. Eric Shade, associate professor in computer science, was a dedicated faculty member who believed in upholding the finest academic tradition of shared governance. Shade served as the Faculty Senate Parliamentarian on eight occasions between 2005 and 2015 and served on numerous Faculty Senate committees. Following Shade’s passing in 2015, the Faculty Senate established the **ERIC SHADE MEMORIAL AWARD IN FACULTY GOVERNANCE** to recognize faculty members who distinguish themselves through sustained and effective service in Faculty Senate and on Senate committees.

.....

Micheal Foster

Theatre and Dance

Micheal Foster is a tenured professor in the department of theatre and dance with a specialization in lighting design, and is the coordinator of the design/technology/stage management BFA degree program. He holds a Bachelor of Arts degree from the University of Alabama, a Master of Fine Arts degree from Ohio University, and interned at Central St. Martin’s College of Art and Design in London, England.

Foster began at Missouri State in 2006 and has designed the lighting for almost 70 department of theatre and dance and Tent Theatre productions. He has mentored undergraduate student lighting designers on nearly 60 productions. Foster has maintained his status as an active professional designer, including more than 20 productions for the Florida Studio Theatre in Sarasota, Florida. Since 2015, he has been a member of United Scenic Artists, Local 829, the professional union for theatrical and film industry creatives.

Service on behalf of the university, college, and department has always been important to Foster. He has served on a number of committees across campus including search committees at the departmental and college level, and as coordinator of two different degree programs within the department. He has served on college council, Dean’s Advisory Committee, chaired the Committee on Faculty Concerns and chaired the Council on General Education and Interdisciplinary Programs (CGEIP). Foster chaired the Faculty Senate during the 2016/17 academic year, and is the current professor rank representative on Faculty Senate.

AWARD FOR EXCELLENCE IN EDUCATION ABROAD PROGRAMMING

The **AWARD FOR EXCELLENCE IN EDUCATION ABROAD PROGRAMMING** honors Missouri State faculty members who demonstrate excellence in developing and leading short-term education abroad programs. Faculty are recognized in two categories. The Cultural Competence category recognizes faculty members whose programs directly address the recognition and respect of multiple perspectives and cultures. The Community Engagement category recognizes faculty members whose programs enable students to participate in an organized service activity that meets reciprocally identified community needs. Each recipient receives \$1,500 in professional development funds and a trophy.

CULTURAL COMPETENCE

Drs. Tamara Arthaud and Ximena Uribe-Zarain

Counseling, Leadership and Special Education

Tamara Arthaud, professor of counseling, leadership and special education, and Ximena Uribe-Zarain, associate professor of counseling, leadership and special education, co-directed the education abroad program, Explore Education and Culture in Historic Querétaro, Mexico: International Perspectives in K-12 Special Education, in 2020 and 2022. The program focused on special education practices in Mexico, including Querétaro’s cultural norms, history, and the comparison of education cultural norms in Querétaro with United States education.

Beyond achieving distinct academic outcomes based on course objectives, students gained cultural awareness through activities designed to present a new perspective and challenge them. The Drs. helped students explore feelings they experienced when confronting cultural shifts and new ways of learning.

Arthaud and Uribe-Zarain developed the course through an inclusive excellence framework, recognizing that inclusive excellence addresses the social inequalities that exist for both the benefit of those who have been marginalized and – critically – for all students. To prepare students for an increasingly diverse world, it is imperative that those with limited cultural exposure learn to understand and communicate effectively with people who are different from themselves.

Evidence of increased cultural awareness was reflected in the comprehensive Beliefs, Events, and Values (BEVI) Inventory results as well as several student statements. Here are some comments from students about the program:

“How amazing the country was. I wish more authentic representations were commonly shared with Americans about Mexico besides just beach spots. The country holds so much history I was completely unaware of.”

“You can only learn so much from a classroom. I will remember so much more about the Mexican culture from experiencing it than if I read about it every night.”

“After this experience, it is my opinion that everyone needs to study overseas at least one time throughout their undergraduate degree. There is not classroom experience that could ever capture what I gained through my education abroad experience. I felt like this experience challenged me to grow as an individual professionally and personally. It was a truly life changing experience for the short time I spent there and something I’ll never forget.”

On one occasion, a student was surprised by the idea that white Americans have a culture. This belief is rooted in the assumption that culture refers to only customs and traditions of non-white, ethnic minority groups. Arthaud and Uribe-Zarain spoke with her about the difference in culture, what culture is and how it is manifested. The student came to understand that she and all other North Americans have a rich and diverse cultural heritage that encompasses a broad range of traditions. However, because white culture is often seen as the default or norm in American society, she was not thinking of these cultural practices as distinct or noteworthy.

HONORS COLLEGE AWARDS

The **CURTIS P. LAWRENCE MASTER TEACHER AWARD** is offered to Honors College faculty members who are exclusively nominated by Honors College students and chosen by an Honors College student committee in collaboration with the Honors College administrative staff. The award was created in honor of the first dean of Missouri State University's Honors College, Dr. Curtis P. Lawrence. This award is offered to recognize excellence in teaching and mentoring by a Missouri State University Honors College faculty member.

Dr. Sam C. Dyer

Department of Communication

The **MARCIA MORRISET AWARD FOR OUTSTANDING SERVICE TO HONORS**

EDUCATION recognizes the exceptional service, mentoring and advising accomplishments of MSU's Honors College faculty and affiliated staff. The award was created in recognition of Marcia Morriset's many years of service to the Honors College. The award is presented to a faculty or staff member who has contributed broadly to the advancement of honors education at Missouri State University and/or has excelled at undergraduate mentorship and advising of Honors College students.

Dr. Kelly Cabrera Hayes

Coordinator International Leadership and Training Center

The **DIRECTOR'S AWARD FOR OUTSTANDING FACULTY RESEARCH** acknowledges the exceptional research accomplishments of MSU's Honors College faculty. This award recognizes a faculty member's research excellence and is meant to acknowledge those Honors College professors who serve as the best example of the ideal scholar/teacher who has not only made a significant contribution to their own field of research, but who have also helped to expand the growth and development of honors education at MSU. Director's award recipients have made major contributions to their own research fields and have participated in the ongoing success of the Missouri State University Honors College.

Dr. Alicia M. Walker

Sociology and Anthropology

FACULTY CENTER FOR TEACHING AND LEARNING AWARDS

These awards recognize faculty who have demonstrated excellence in teaching and dedication to student success. This year there were five recipients of this award.

Dr. Jessica Elliott

History

Jessica Elliott teaches Medieval Europe, an asynchronous online history course. Teaching online, she has created an engaged community where students discuss reading assignments through a social annotation environment. This allows Elliott to understand students' thinking, questions, and misconceptions about what they are reading, and then give targeted feedback. Students share that they appreciate the course videos, insightful readings and online learning experience. When asked about the course, one student said: "I feel that (Dr. Elliott) truly wants to help students to think critically about what we are learning."

Dr. Timothy Flannery

Economics

Timothy Flannery teaches in the economics department. He has transformed the economics curriculum in both content and delivery of the courses Game Theory, Behavioral Economics, and Behavioral Economics and Public Policy. These transformations include real-life applications students can relate to and use after graduation. Students learn economic theory and complex concepts through game-based instruction and in-class experiments. His commitment to his students is evident through practices like creating introductory notes for each new topic and being available to students after class. A former student said he remembered that "(Dr. Flannery) was against piling publisher content onto his students, (creating) his own homework, quiz and exam questions."

Dr. William Harwood

Philosophy

William Harwood is an assistant professor of philosophy, and he strives to help students be informed citizens and engaged scholars by creating a safe environment in which all students can discuss difficult issues. He believes growing up in the deep South has been an asset to his role as an educator. Comments from students are a testament to this belief. They have said: "This course gave me plenty of tools to fight for justice (and) what I believe is good." "(This class) helped me to discover so much about the world and myself." Harwood has encouraged engaged scholars. One student said they reached "a place of respect for the philosophies we studied and find the beauty in each. I think I will probably delve deeper into each at different points in my life. Which is definitely a surprise for me."

FACULTY CENTER FOR TEACHING AND LEARNING AWARDS

These awards recognize faculty who have demonstrated excellence in teaching and dedication to student success. This year there were five recipients of this award.

Dr. Amber Howard

Childhood Education and Family Studies

Amber Howard teaches childhood education and family studies. She frames her teaching around three themes: humanizing, being relevant and relation-centered pedagogy. She has modified her course policies and teaching practices to be more student-centered and focused on equity, inclusion and trauma informed pedagogy. She believes that students learn more when their humanity and identities are recognized and celebrated. Howard put this philosophy into action when advising a pre-service teacher who was afraid her learning disability would hold her back from teaching elementary students. She credited Dr. Howard with helping her see her learning disability as a strength in the classroom and not a weakness. The student said “(I) found confidence within myself to trust my teaching ability. ... Dr. Howard is the reason I am ready to become an educator.”

Dr. Scott Worman

Sociology and Anthropology

Scott Worman teaches the general education course Exploring Our Human Ancestry. He strives to make course materials relevant, available and affordable. When textbook costs exceeded \$125, Worman made the decision to teach textbook-free using a series of shorter readings, relevant web resources and videos. He has also transformed student research projects in his upperclassman courses to make fieldwork more accessible to students. He partnered with colleagues to provide local historical archaeology field experiences dropping costs to one-tenth of what a national field school experience would cost. Worman has supervised dozens of student internships with organizations like the Springfield History Museum, the Center for Archaeological Research and the Mark Twain National Forest. He also advises student research projects, many of them being published in the Missouri Archaeological Society Quarterly, Logos and conference presentations.

CITIZENSHIP AND SERVICE-LEARNING AWARDS

EXCELLENCE IN SERVICE-LEARNING AWARD

This award is presented to faculty in grateful appreciation and distinguished recognition of their hard work, dedication and commitment to excellence in fostering service-learning.

This year’s Excellence in Service-Learning Award honors three outstanding faculty members who were selected as recipients for the Bonner Community-Engaged Learning Fellowship Stipend Award:

Lori Rogers

English

Lori Rogers is a senior instructor in the department of English and has been at Missouri State since 2004. In her ENG 310 class, students worked in teams in partnership with community organizations to conduct research and develop conclusions and solutions from the results. They worked on designing documents, and developing programs or methods to address the organization’s needs.

Taleyna Morris

Communication

Taleyna Morris joined the department of communication in 1997 and became a full-time senior instructor in 2015. In her COM 332 class, students worked in six teams to complete research for organizations working to address issues within the community, including food pantry outreach, prenatal care and increasing volunteer pools.

Bernard Kitheka

Kinesiology

Bernard is an associate professor in the department of kinesiology. He joined Missouri State in 2016. In his spring 2023 REC 311 class, Kitheka’s students examined issues surrounding inequities in outdoor spaces and how to support equity and diversity in recreational or physical activities.
