Tips for Success:

- ^R Required for Dietetics.
- ¹ If a student takes CHM 160, then CHM 161, 170 and CHM 171 MUST be taken. Consult with an advisor as, although preferred, this does change the schedule.
- ² Students who are planning a chemistry minor will need to take CHM 202, which is organic chemistry lab. This class is offered all semesters. The additional chemistry classes are taken in the summer, or during the regular semester, with other courses taken in the summer.
- GPA Requirements include: 2.9 GPA and completion of DTN 240, DTN 305, BMS 308, and chemistry sequence for admission to program.
- Take BMS 195 if you are undecided about a major and would like to explore health care.
